

**ALBAN D'HALLUIN, NEW CEO OF
PRODWAYS TECHNOLOGY:**

« 2017 will be a strategic year
for Prodways !»

Paris, January 12th 2017, 18 :00

About Groupe Gorgé

Established in 1990, Group Gorgé is an industrial group operating in different areas of expertise:

Smart Safety Systems — Using technology to work in risk environments;

Protection in Nuclear Environments — Protecting people and securing buildings operating with radioactive materials;

Industrial Projects & Services — Conducting Robotics and Fire protection systems projects for industry and service-sector player;

3D Printing — Enabling major industry players to find new routes to successful innovation and production processes by providing systems, 3D printers and new premium material.

In 2015, the Group reported revenue of €264.5 million. It is backed by 1,536 employees and operations in over ten countries.

Alban D'Halluin, new CEO of Prodways Technology: "2017 will be a strategic year for Prodways!"

The head of partnerships and R&D at Prodways Technology* since 2015 and recently appointed CEO, Alban d'Halluin looks back at a year marked by significant developments and announces the ambitious goals of Prodways Technology.

You took charge of Prodways Technology in late 2016. How would you assess the past year?

"Prodways Technology is a company brimming with talent and innovation potential. All our skills are focused on our customers and their applications to create industrial solutions that will allow them to innovate and stand out in their markets. The year was marked by good progress, in particular with the development of a new 3D metal printing technology and our unequaled performance in terms of rapidly manufacturing 3D-printed parts. I am proud to be appointed to lead a team with such great potential for innovation and thrilled about the first highly promising industrial prospects."

On that note, could you tell us about your customers and their applications?

"3D printing is a highly confidential industry and we can't talk about all of our projects. Fortunately, it is also a very small world and we are starting to make a name for ourselves as a key player in various areas, particularly in the dental sector where our expertise has become invaluable.

Prodways – Cindy MANNEVY – Marketing & Communication Manager – Tél. : +33 (0)1 30 90 44 12 – E-mail : c.mannevy@prodways.com

Groupe Gorgé – Nathalie LAGOS – Communication Manager – Tél. : +33(0)1 44 77 94 86 – E-mail : n.lagos@groupe-gorge.com

Moreover, at the end of March we will participate in IDS – the largest dental trade show in the world – where we hope to make a strong impression.

Thanks to the great potential of 3D printing, we are breaking the codes of conventional manufacturing and opening up new prospects, in particular in the automotive industry where our high-temperature laser sintering printers combined with BASF's PA6 powder allow us to manufacture parts with excellent resistance to heat distortion that are perfectly suited to hot engine parts for Formula One cars or high-end/specialized vehicles.

In other areas, such as plastic injection, blowing, jewelry-making and podiatry, our technologies extend beyond the limits of conventional production, but these applications are too numerous to describe them all here."

What are your goals for 2017, and what will be your strategy?

"Prodways Technology is determined to keep growing in 2017. Our technological innovations and our collaboration with leading partners such as Arkema, A. Schulman and the CEA [French Alternative Energies and Atomic Energy Commission] will begin to bear fruit. The year will be marked by key events, such as the AMUG conference at the end of March and Rapid in the US, where Prodways Technology will present its latest advances. In addition, Prodways Technology will continue to expand its selective laser sintering offer and the MOVINGLight® range as the prospects opened up by these two technologies are endless. Personally, I am convinced that great things lie in store for Prodways and that 2017 will illustrate our determination to take 3D printing to a higher level of excellence."

###

About Prodways:

Prodways, a Groupe Gorgé subsidiary, supports key industrial players with their innovations and production processes by offering premium solutions for additive manufacturing.

Prodways' strategic positioning is to harness the power of technology and equip itself with service and support functions to help firms grow and meet their industrial challenges:

- *By delivering a high-quality industrial solution;*
- *By offering them a full range of technologies able to meet productivity and reliability requirements;*

Contacts

- By developing materials suited to industrial constraints (e.g. mechanical properties, biocompatibility, flammability);
- By offering engineering and product design solutions together with consulting services on production processes and technologies;
- By testing business processes upstream through the manufacturing of test parts and process simulations;
- By offering manufacturing and backup solutions while managing peaks of activity;
- By investing in innovative players in the 3D ecosystem.

To date, Prodways is one of the rare players able to meet all of these industrial challenges and to foster the emergence of additive manufacturing in mass production. To this end, Prodways' offer relies on complementary activities allowing it to position itself as a serious alternative to the two global market leaders and, at the same time, to become the only non-American company providing customers with a wide range of 3D printing technologies and all 3D printing services.

Disclaimer

This press release could contain statements on past events and forward-looking statements including statements regarding future goals or targets. Forward-looking statements reflect current expectations for results and future events.

Such forward-looking statements and targets depend on known and unknown risks, uncertainties and other factors that may cause actual results, performance or events to differ materially from those anticipated herein. All these risks and uncertainties could affect the Group's future ability to achieve its targets. Risks, uncertainties and other factors that could cause actual results to differ materially from the results anticipated in the forward-looking statements and targets include, among other things: the risks and uncertainties possibly mentioned in this press release; the strength of competition; the growth of the market; currency fluctuations; interest rate fluctuations; raw materials and freight price fluctuations; armed conflicts or political instability; control of costs and expenses; changes in tax legislation, rules, regulation or enforcement; our ability to successfully keep pace with technology changes; our ability to attract and retain qualified personnel and key-men; the evolution, interpretation and uniform application and enforcement of International Financial Reporting Standards (IFRS), according to which we prepare our financial statements; supply chain bottlenecks; the performance of our business partners (subcontractors, agents, suppliers, etc.).

Some of these risk factors are set forth and detailed in our Document de Référence (Registration Document including the annual financial report filed with the French Autorité des Marchés Financiers). This list of risks, uncertainties and other factors is not limitative. Other non-anticipated, unknown or unforeseeable factors could also have material adverse effect on our targets. The Group expressly disclaims any obligation or undertaking to update or revise any forward-looking statements or targets potentially contained in this press release to reflect any change in events, conditions, assumptions or circumstances on which any such statements are based.
